

# **Equal treatment between men and women: self-employed workers and their spouses**

2008/0192(COD) - 23/06/2010 - Commission opinion on Parliament's position at 2nd reading

The European Parliament made a limited number of amendments to the Council's position and their main aim is to clarify the text, rather than changing its scope. The amendments voted by Parliament have been discussed and agreed during the discussions between the two co-legislators, supported by the European Commission. The Commission accepts all the amendments voted by the European Parliament, as they are in line with the overall purpose of the proposal.
