

European satellite navigation systems: implementation and exploitation 2014-2020

2011/0392(COD) - 12/12/2011

The Commission presented its proposal for a regulation on the implementation and exploitation of the European satellite navigation programmes EGNOS and Galileo to ministers. The proposal, which will replace Regulation (EC) No 683/2008, establishes in particular the rules for the financing and governance of the programmes for the period 2014 to 2020.

The incoming Danish presidency will continue work on this proposal.
