Fishery resources: recovery of cod stocks, long-term plan; aligning the Regulation with the TFEU (Commission delegated and implementing powers)

2012/0013(COD) - 24/04/2013 - Committee report tabled for plenary, 1st reading/single reading

The Committee on Fisheries adopted the report by Diane DODDS (NI, UK) on the proposal for a regulation of the European Parliament and of the Council amending Council Regulation (EC) No 1342 /2008 of 18 December 2008 establishing a long-term plan for cod stocks and the fisheries exploiting those stocks.

The parliamentary committee recommends that the European Parliament's position adopted at first reading according to the ordinary legislative procedure should amend the Commission's proposal.

Amendment of the multiannual plan: Members want it explicitly stated that any amendment to the multi-annual plan, apart from the exceptions specified in the regulation, would have to be adopted via the **ordinary legislative procedure**.

Adoption of delegated acts: before taking a decision to adopt delegated acts to set fishing mortality rates and associated spawning stock biomass, the Commission should be required to use **scientific data** from the Scientific, Technical and Economic Committee for Fisheries (STECF) and consult the relevant Regional Advisory Council.

Members propose to **limit the delegation of power to a period of three years from the date of entry into force of the Regulation** and to oblige the Commission to present a report on its exercise in order to have a regular evaluation and questioning of the use of the delegation.
