

Conservation of fishery through technical measures in the Baltic Sea, the Belts and the Sound: aligning the Regulation with the TFEU; Commission delegated and implementing powers

2012/0285(COD) - 15/07/2013 - Committee report tabled for plenary, 1st reading/single reading

The Committee on Fisheries adopted the report by Marek Józef GRÓBARCZYK (ECR, PL) the proposal for a regulation of the European Parliament and of the Council amending Council Regulation (EC) No 2187/2005 for the conservation of fishery through technical measures in the Baltic Sea, the Belts and the Sound.

The committee recommends that the European Parliament's position at first reading, following the ordinary legislative procedure, should amend the Commission's proposal as follows:

Members propose to add a new article on the overall **assessment and review** so as to enable the Commission to review, by one year after the entry into force of the Regulation on the Common Fisheries Policy, the effectiveness of the measures laid down in this Regulation, and, where appropriate, submit a legislative proposal to the European Parliament and to the Council for the amendment of this Regulation in order to ensure that it is compatible with the Common Fisheries Policy Regulation.

In addition, Members propose **limiting in time the empowerment of the Commission**. The power to adopt delegated acts shall be conferred on the Commission for a period of three years (renewable) from the entry into force of the Regulation. The Commission shall draw up a report in respect of the delegation of power not later than nine months before the end of the three-year period.
