

International Accounting Standards (IAS) evaluation and activities of the International Financial Reporting Standards (IFRS) Foundation, European Financial Reporting Advisory Group (EFRAG) and the Public Interest Oversight Board (PIOB)

2016/2006(INI) - 07/06/2016 - Text adopted by Parliament, single reading

The European Parliament adopted by 559 votes to 36, with 80 abstentions, a resolution on International Accounting Standards (IAS) evaluation and the activities of the International Financial Reporting Standards (IFRS) Foundation, the European Financial Reporting Advisory Group (EFRAG) and the Public Interest Oversight Board (PIOB).

Importance of IFRS and ISA standards: Members recalled that the International Financial Reporting Standards (IFRS) and the international standards on auditing (ISA) are one essential component needed for the **efficient functioning of the internal market and of the capital markets**. The purpose of the IFRS is to strengthen accountability by reducing the information gap between investors and companies, to protect investment, to bring transparency through enhancing the international comparability and quality of financial information, to enable investors and other market participants to make informed economic decisions.

The International Accounting Standard Board (IASB) functions under the umbrella of the IFRS Foundation. The EU contributes around 14 % of the IFRS Foundation's budget and is therefore its largest financial contributor.

Evaluation of the application of IFRS in the EU ten years since their application: Parliament noted the [Commission's IAS evaluation report](#) on the application of the [IFRS](#) in the EU and its assessment that the objectives of the IAS Regulation have been met. It regretted that the Commission has **not yet proposed the legal changes that are required** to solve the shortcomings identified in its evaluation.

Parliament called on the standard setter to **ensure that the IFRS are coherent** within the existing body of accounting standards and to promote convergence at international level. It called for a **more coordinated approach** in developing new standards, including coordinated timelines for application, in particular with regard to the implementation of IFRS 9 Financial Instruments and the new IFRS 4 Insurance Contracts. It urged the Commission to put forward diligently legal proposals to this end.

Endorsement process and criteria: Members recalled that an IFRS should not be contrary to the true and fair view principle as included in the Accounting Directive, which requires that financial statements must give a 'true and fair' view of a company's assets and liabilities, financial position and profit or loss.

The Commission is asked to:

- comply with the Maystadt recommendation regarding **expansion of the ‘public good’ criterion**, i. e. that accounting standards should neither jeopardise financial stability in the EU nor hinder the EU’s economic development, and to ensure that this criterion will be fully respected during the endorsement process;
- together with EFRAG, **issue clear guidelines on the meaning of the ‘public good’ and the ‘true and fair view’ principle** on the basis of ECJ case-law and the Accounting Directive in order to arrive at a common understanding of these endorsement criteria;
- put forward a **proposal** to incorporate Maystadt's definition of the 'public good' criterion into the IAS Regulation.

Simplified standards: according to Members, the **effects of an accounting standard must be fully understood**. It should be a priority for the IASB and EFRAG to strengthen their impact analyses, notably in the field of macroeconomics, and to assess the different needs of the wide variety of stakeholders, including long-term investors and companies, as well as the general public. Moreover, a **less complex accounting standards system** would contribute to more uniform implementation so that company financial data are comparable between Member States.

Further involvement of the Parliament: the resolution asked the IASB, the Commission and EFRAG to **involve Parliament and the Council at an early stage** when developing financial reporting standards in general and in the endorsement process in particular. It called on the Commission to create a space for stakeholders to discuss fundamental principles of accounting in Europe and to grant Parliament the possibility of receiving a short list of EFRAG board president candidates. **Parliament should play the role of an active promoter of IFRS.**

Taking account of SME’s interests: Parliament noted the Commission’s intention to explore with the IASB the possibility of developing **common high-quality and simplified accounting standards for SMEs** which could be used, on a voluntary basis, at EU level by SMEs listed on Multilateral Trading Facilities (MTFs), and more specifically SME growth markets. It believed that, as a condition for work to continue in this field, IFRS have to be less complex, and that SME interests should be sufficiently represented on the IASB.

Parliament welcomed the Commission’s intention to examine the case for coordinating the EU rules relating to **dividend distribution**. It also called on EFRAG and the Commission to examine whether accounting standards allow **tax fraud and tax avoidance** and to make all the necessary changes to prevent potential abuse.

Activities of the IFRS Foundation, EFRAG and the PIOB: Parliament supported the Commission recommendations that the Monitoring Board of the IFRS Foundation should shift the focus of its attention from the issue of internal organisation to discussing matters of public interest that could be referred to the IFRS Foundation.

Members believed, however that further progress should be made as regards **the governance of the IFRS Foundation and the IASB**, in particular in terms of transparency, prevention of conflicts of interest and diversity of hired experts. Parliament was particularly in favour of:

- the Commission's proposal to consider the reporting needs of investors with different investment time horizons and to provide specific solutions, in particular for **long-term investors**, when developing their standards;
- **better integration** of the IASB into the system of international financial institutions;
- steps to ensure **broad representation** (such as consumer representation agencies and finance ministries) of interests and public accountability that will guarantee high-quality accounting standards.

Noting the dominance of private actors on the IASB, Parliament called on the Commission to urge the IFRS Foundation to aim for a **more diversified and balanced financing structure**, including on the basis of fees and public sources, thus preventing conflicts of interests.

Lastly, Parliament stressed that the EFRAG reform must improve the European contribution to the development of the new IFRS and could participate in the reform of governance of the IFRS Foundation.
