

2017 discharge: EU general budget, European Data Protection Supervisor

2018/2175(DEC) - 12/07/2018

PURPOSE: presentation of the Annual report of the Court of Auditors on the implementation of the budget concerning the financial year 2017.

CONTENT: the Court of Auditors published its 41th annual report on the implementation of the general budget of the Union for the year 2017. This report follows a five-part structure:

- the statement of assurance (DAS) and a summary of the results of the audit on the reliability of accounts and the regularity of transactions;
- the analysis of budgetary and financial management;
- the Commission's performance reporting framework;
- the findings on EU revenue;
- the presentation of the main headings of the current multiannual financial framework (MFF), the results of the testing of the regularity of transactions.

The Court concludes that payments for 2017 are legal and regular, with the expenditure recorded in 2017 covering spending on a reimbursement basis. It believes that the EU accounts present a true and fair view of the EU's financial position.

The report also assessed the potential impact on the 2017 accounts of the United Kingdom's withdrawal from the European Union. On 29 March 2017, the United Kingdom (UK) formally notified the European Council of its intention to leave the European Union (EU). On 22 May 2017, the negotiations started for the withdrawal agreement between the EU and the UK.

Part Five (Financial Provisions) of the draft withdrawal agreement of 19 March 2018 concerning the financial settlement states that the UK will pay all its obligations under the current and previous Multiannual Financial Frameworks as if it were still a Member State.

Based on this, the Court concluded that the accounts as at 31 December 2017 correctly reflect the withdrawal process.

The audit also focuses on the budget implementation of the *European Data Protection Supervisor*.

The overall audit evidence indicates that the level of error in spending on 'Administration' was not material. For this MFF heading, the testing of transactions produced an estimated overall level of error of 0.5 %

The Court did not detect any specific problem regarding the European Data Protection Supervisor.
