2017 discharge: EU general budget, European Parliament

2018/2167(DEC) - 11/02/2019 - Supplementary non-legislative basic document

Based on the observations contained in the report by the Court of Auditors, the Council called on the European Parliament to grant discharge to all of the EU institutions in respect of the implementation of their respective budgets for the financial year 2017.

However, it considered that budget implementation required a series of comments from the Council which should be fully taken into account by the Commission.

The Council welcomed the fact that the administrative and related expenditure of the EU institutions remained, as in previous years, free from material error with an estimated level of error of 0.5 %, which while being well below the materiality threshold is higher by 0.3 % compared to the Court's findings for 2016 (0.2 %). It noted with satisfaction that no serious weaknesses were identified by the Court in the supervisory and control systems and in the examined annual activity reports.

The Council took note of the Court's observations on the European Parliament related to work carried out on buildings under a contract resulting from a procurement procedure and to the lack of control on payment of subsidies to groups of visitors. The Council invited the European Parliament to improve the selection and award criteria for its procurement procedures and to strengthen its procedures in validating the reimbursements to requesting visitor groups in line with the Court's recommendation.

The Council took note that, as in previous years, there was a small number of errors relating to staff costs and some weaknesses in the Office for Administration and Payment of individual entitlements' (PMO) management of family allowances. It called on the Commission to improve its procedures to avoid errors related to staff expenditure.
