

Annual strategic report on the implementation and delivery of the Sustainable Development Goals (SDGs)

2018/2279(INI) - 14/03/2019 - Text adopted by Parliament, single reading

The European Parliament adopted by 296 votes to 33 with 20 abstentions a resolution on the annual strategic report on the implementation and delivery of the Sustainable Development Goals (SDGs).

Parliament recalled that the 2030 Agenda for Sustainable Development, adopted at the UN Sustainable Development Summit in September 2015, represents an ambitious vision for a more prosperous, inclusive and resilient world based on the Union's core values of democracy, participation, good governance, social justice, solidarity, sustainability and respect for the rule of law and human rights. However, the achievement of the SDGs represents a challenge, and the 17 goals and 169 targets require coordination between the EU and its Member States, the European Parliament, national parliaments and regional and local authorities, as well as a multi-level governance approach, based on active and broad-based public, civil society and private sector engagement. Parliament noted that the UN estimates that investments of USD 5 to 7 trillion are needed annually to achieve the SDGs, and insisted, therefore, on the need to mobilise investments, welcoming the potential of the [EU External Investment Plan](#) in this regard.

European leadership for universal values within a multilateral framework

Parliament welcomed the [Commission Reflection Paper](#) entitled 'Towards a Sustainable Europe by 2030', which sets out three scenarios for how the EU might take forward the SDGs. It ***favoured the first scenario, which proposes an overarching strategy*** for the implementation of the SDGs by the EU and the Member States. It emphasised that the implementation of the SDGs should lead to a paradigm shift and become the EU's overarching long-term economic model to succeed the current Europe 2020 strategy. The Union should renew its commitment to being a global frontrunner in implementing the 2030 Agenda and the SDGs, and this political engagement should be reflected in the multiannual financial framework (MFF) for 2021-2027.

Enhancing strategic EU action towards achieving the global goals

Parliament called on the Commission to:

- establish an in-depth gap analysis of existing policies and their implementation in order to identify critical areas of synergies and incoherencies;
- clearly identify the steps to be taken by 2030 in terms of policies and legislation, statistics and disaggregated data collection, and governance and implementation, in order to establish, by the end of 2019, a comprehensive strategy for the achievement of the 2030 Agenda;
- align programmatic, financing and operational policies, approaches and methodologies with the UN and its partners, in order to improve effectiveness on a number of common priorities such as gender equality and reproductive, and child health, climate change and the environment, addressing inequalities and poverty;
- set out common indicators, benchmarks and targets, and an analysis of the distance to targets and goals, the actions required to reach them and the means by which they will be implemented.

Members stressed that ensuring tax justice and transparency, fighting tax avoidance and evasion, eradicating illicit financial flows and tax havens and increasing domestic resource mobilisation is crucial to the financing of the 2030 Agenda.

Parliament welcomed the publication of the second Eurostat monitoring report on sustainable development in the EU, which represents a step forward towards the creation of a fully-fledged EU monitoring mechanism.

Policy coherence, coordination and mainstreaming of SDGs

Parliament welcomed the adoption of the 2019 [Commission report](#) on Policy Coherence for Development (PCD) and the attempt to better integrate PCD into the EU approach to implementing SDGs. The Commission was urged to adopt a follow-up action plan in line with the recommendations of the external evaluation of PCD calling for the adoption of a clear set of rules for the implementation of the concept. Furthermore, Members wanted the PCD to be discussed at European Council level in order to give impetus to the implementation of its mechanisms in pursuit of the goals of the 2030 Agenda for Sustainable Development, and the EU institutions to show leadership and adapt their own governance to allow for the mainstreaming of the SDGs within their work.

Voluntary National Reviews (VNRs) and EU reporting for the UN General Assembly HLPF 2019

Parliament recalled that the United Nations High-Level Political Forum on Sustainable Development (HLPF) will meet in September 2019 at summit level to take stock of the implementation of the 2030 Agenda as a whole, and at ministerial level in July 2019, to review progress on 6 of the SDGs, and annually thereafter in order to conduct progress reviews of the goals not reviewed under the 2019 thematic review. Members strongly supported the Union's commitment to completing a voluntary review at the HLPF, and expected the Union to play a leading role in the summit. They noted that progress made by Member States varies depending, among other factors, on the SDG in question, national priority objectives and targets. The SDGs are highly interlinked and that an integrated and comprehensive systemic approach to their implementation should be pursued.

Focus on the SDGs under the upcoming in-depth review at the HLPF 2019

Members welcomed the upcoming in-depth review of SDGs 4 (quality education), 8 (decent work and economic growth), 10 (reduced inequalities), 13 (climate action), 16 (peace, justice and strong institutions) and 17 (partnerships for the goals) and expected the Union to contribute comprehensively to the review in full.

They made observations on the attainment of these SDGs, stressing the need for greater investment to improve the quality of education and accelerated progress towards reducing growing disparities and promoting equal opportunities for all. Parliament stated also that there should be:

- further contributions towards achieving SDG 8, including improvements to productivity capacities, revenue generation, industrialisation, sustainable consumption and production patterns, trade, private sector development, business environments, infrastructure and tourism.

- communication strategies and activities to increase public and political support for climate action and to raise awareness of the co-benefits of fighting climate change, such as improved air quality and public health.

Parliament called for a EU budget that gives sustainable development the status of a primary objective, recalling at the same time that the fight against fraud and tax evasion is an issue of solidarity development.
