Combating social exclusion and encouraging solidarity: programme of support 1994-1999

1993/1221(COD) - 05/10/1995

The Council re--examined the proposal for a decision on a programme to combat exclusion, on which two delegations maintained general reservations. Commissioner FLYNN informed the Council of the call for proposals issued by the Commission within the framework of the appropriations entered in the 1995 budget for actions in that area and of the large number of projects that the call had produced. Concluding the discussion, the Presidency noted that the Commission would consult a high--level working party in order to overcome the existing deadlock and that it would inform the Council of the conclusions it drew from that consultation.
