

National aid granted in compensation for losses of agricultural income caused by monetary movements

1995/0197(CNS) - 17/07/1995

Following the undertaking given by the Council in June 1995 in the context of its political agreement on an overall compromise, the Commission submitted to the Council a proposal to grant flat-rate compensatory aid, reducing over three years, to producers who had suffered considerable losses of income in a Member State because of the significant monetary movements that had occurred in other Member States.
