Energy: a review of Community energy legislation

1995/2227(COS) - 20/12/1995

As part of the ongoing exercise to simplify Community energy legislation, the Council held an exchange of views on the Commission report on a review of Community energy legislation and the communication from the Commission concerning the repeal of several Community legislative texts (three regulations and five recommendations) in the field of energy policy. Noting that its members were favourably disposed towards the proposal, the Council instructed the Permanent Representatives Committee to finalise work in the light of Parliament’s recent opinions.
