

Combating corruption in the private sector. Framework Decision. Initiative Denmark

2002/0817(CNS) - 28/11/2002

The Council, pending the solving of the only outstanding question concerning the possibility for a Member State to limit the application of the Framework Decision to conducts involving a distortion of competition, broadly agreed on the text of the draft Framework Decision for combating corruption in the private sector. The Council therefore instructed its bodies to examine this outstanding question as soon as possible, with a view to reaching a general approach on the draft Framework Decision at one of its next forthcoming sessions.
