Car industry: equipments for motor vehicles fuelled by liquefied petroleum gas. Revised agreement, UN/ECE Regulation 67

1999/0018(AVC) - 30/03/2000 - Legislative proposal

On 30 March 2000, the Council proposed a revised version of the text of the proposal which was formally presented by the Commission and which aims to permit the Community to accede to Regulation 67, as amended by the UNECE, on the approval of special equipment for motor vehicles fuelled by liquified petroleum gas. This new text does not include any significant changes in comparison with the earlier text. It should enter into force with regard to all Contracting Parties which have not made known their opposition, on the dates(s) specified in the UNECE Regulation and should be incorporated into the approval system for Community vehicles.
