Support system for producers of certain arable crops (amend. regul. 1765/92/EEC)

1995/0265(CNS) - 01/02/1996 - Economic and Social Committee: opinion, report

The Committee points out that although the Commission's initiative is aimed basically at setting up, under the basic Regulation 1765/92/EEC, the legal machinery for ensuring that the pledges arising out of the Blair House Agreement are kept, the proposed measures will in fact discourage the growing of crops which might be used for the extraction of fuels.
