Biocidal products for non-agricultural uses: common rules for national authorisations

1993/0465(COD) - 27/03/1996 - Economic and Social Committee: opinion, report

The Committee has already issued an Opinion (OJ C195 of 18/7/94) on the original Commission Proposal, concerning the placing of biocidal products on the market; the Opinion was generally favourable while suggesting a number of improvements. The Committee has no objection to establishing common principles for evaluating dossiers (for the authorization of biocidal products) under the current Amended Proposal, which it approved, subject to several comments designed to clarify and/or emphasize the contents of the Annex.
