Wine: common organisation of the market COM (amend. regul. 822/87/EEC)

1997/0161(CNS) - 01/10/1997 - Economic and Social Committee: opinion, report

The Committee broadly supports the adjustments proposed by the Commission. However, it has reservations about the procedure for fixing flat-rate entry prices for grape juices and musts. As it is difficult to determine these prices in the third countries of origin, the ESC thinks that it would be more practical to determine them on the basis of the average price at certain Community markets, as these markets are bound to be able to provide real data on market trends in these products.
