Marketing of beet seed, fodder plant and cereal seed... Common catalogue of agricultural plant species

1997/0217(CNS) - 16/04/1998

The Committee adopted the report by Mr Graefe zu BARINGDORF (Greens, DE). The report, which is more technical in character, concerns the marketing of a number of types of seed (beet, cereal, vegetable, etc), and introduces an important amendment, relating to the random sampling of seeds by official inspectors for purposes of checking and certification and stating that future sampling checks should involve between 10% and 20% of the production of a species.
