Control system applicable to the Common Fisheries Policy (amend. Regulation 2847/93 /EEC)

1997/0189(CNS) - 29/10/1997 - Economic and Social Committee: opinion, report

The Committee endorses the proposal. However, it takes the view that the measures for monitoring the management of fishing effort should be adopted in the EU in collaboration with the IBSFC, in order that they may be applied to all the countries that fish there.
