Control of certain fish diseases (amend. direct. 93/53/EEC)

1996/0158(CNS) - 31/10/1996 - Economic and Social Committee: opinion, report

The Committee endorses the Commission's proposal to amend Directive 93/53/EEC so that it applies to viral diseases (IHN and VHS) only, because the measures laid down in the directive should not be applied to the parasite Gyrodactylus salaris, which is to be transferred to list II.
