

Free movements of goods: exchange of information on national measures

1993/0489(COD) - 29/03/1994

The Members adopted the draft report by Mr de la CAMARA MARTINEZ. The rapporteur felt that the measures should be suitably coordinated to prevent overlaps with the procedures for notification and information laid down by other provisions. In order that the enterprises, consumers and other parties concerned knew who to contact within the Commission and national administrations, the rapporteur suggested, on the one hand, the establishment of a contact body in each of the Member States and, on the other, the establishment within the Commission of a special coordination unit responsible for dealing with all the problems relating to the application of this directive. Mr de la CAMARA MARTINEZ believed that when a decision was likely to create unreasonable obstacles to the free movement of goods, the Commission should put forward suitable measures.
