Postal sector: rules of competition, assessment of certain state measures relating to the postal services

1995/2305(COS) - 20/11/1996

Judging that the Commission communication on the application of the rules of competition runs counter to the proposal for a directive on the development of postal services, the Committee on Economic and Monetary Affairs (consultation procedure, report by Georges BREMOND D'ARS, EPP, F) concluded that the text should be withdrawn. The committee considered that the aim should be to establish a harmonized and to a large extent liberalized postal market which ensures quality services at an affordable price for all users.
