Series of guidelines for trans-European telecommunications networks

1995/0124(COD) - 26/06/1996

The committee adopted all the amendments presented by the rapporteur Friedrich HOPPENSTEDT. The report maintained the approach taken at first reading. Although there were differences of opinion as to the content, the main problems in reaching an agreement with the Council were likely to be of a procedural nature. The report disputed Council's interpretation of the articles of the Treaty on trans-European networks.
