

Common fisheries policy CFP: restructuring, action programme

2003/2039(INI) - 06/11/2002 - Non-legislative basic document

PURPOSE : to propose an Action Plan to counter the social, economic and regional consequences of the restructuring of the EU fishing industry. **CONTENT** : the European Commission has proposed this action plan to respond to the potential social, economic and regional consequences of restructuring the fishing industry caused by the dire state of several fish stocks. This action plan, which was prepared after consultations with the Member States, identifies the possible impact of the fishing effort limitation in certain areas for certain stocks proposed by the Commission in the context of the reform of the Common Fisheries Policy (CFP). The present Communication from the Commission thus includes: - an assessment of the likely socio-economic impacts of fishing effort limitations and reductions in vessel numbers in particular a review of the provisional estimate of lost jobs; - a review of all the existing means to alleviate these impacts within the existing Community aid regimes (FIFG, ERDF and ESF2); - an overview of additional means which could become available in the short term through the reform of the CFP and the reprogramming of the Structural Funds; - an analysis of further options for the longer term. The measures set out in the action plan should be used by Member States to alleviate the short-term consequences of the proposed conservation measures for affected fishermen and other operators in the fishing industry. They include the reprogramming of € 611 million under the FIFG for social measures and for reducing fleet capacity, specific measures in favour of small-scale fishing, the improvement of living and working conditions on board, as well as social protection in the fisheries sector and measures to help young fishermen. Bilateral consultations with Member States have confirmed that it is not possible at this stage to make a reliable estimate of affected jobs, as no decision has been taken yet on multi-annual management plans.
