

Control of volatile organic compound (VOC) emissions resulting from the storage of petrol and its distribution from terminals to service stations, Stage 1

1992/0425(COD) - 10/06/1993

The ENVI Committee adopted the draft report by Mr Guermeur (RDE, FR). 25 of the 40 amendments presented by the rapporteur, Mr Guermeur, and by Mr Van der Waal, Mr Alber and the Energy Committee were adopted. Most of these amendments were highly technical in nature, although under amendment 36, presented by the rapporteur, it was possible to exclude small capacity service stations in geographically remote places when they had been granted a derogation by their Member State.
