# Public health: limitation of exposure of the general public to electromagnetic fields 0Hz-300GHz. Recommendation

1998/0166(CNS) - 18/02/1999

The report by Mr Gianni TAMINO (Greens, I) on a Commission proposal for a Council recommendation on limiting the exposure of the general public to electromagnetic fields. As you can see from the rapporteur's explanatory statement, radiation of this kind originates both outside people's houses (electricity transmission lines, radar, television trasmitters, etc) and inside (microwave ovens, hair dryers, electric razors, TVs, videos and mobile phones). The amendments adopted include a call for legislation and the establishment of a uniform Community framework to eliminate any possible public health hazard.
