# Fishery and aquaculture products: common organisation of the markets COM (amend. Regul. n 3759/92/EEC)

1994/0212(CNS) - 12/12/1994

The committee unanimously adopted the report supporting the Commission's response to the crisis in the fisheries sector. However, members adopted two amendments to strengthen the Commission's proposals on the following points: - in the case of a drop in prices Member States shall grant to the producers' organization a flat-rate financial compensation limited to the period of the crisis in the market; - in the tuna market, it was agreed that the triggering threshold should be set at 91% and not 85% as the Commission had proposed.
