Protection of animals during transport (amend. direct. 91/628/EEC)

1993/1197(CNS) - 13/07/1993 - Legislative proposal

The purpose of this proposal is to amend Directive No 91/628 concerning the protection of animals during transport, in order to add two new chapters to the annex setting out requirements for the space allocated to the animals, the minimum travelling times and minimum rest periods. It is also proposed that, where reliable scientific evidence is available, the annex be amended and specific requirements incorporated for clearance in vehicles and scheduled feeding and watering intervals for certain types of animals.
