Multi-annual Community action concerning the development of ISDN as a trans-European network

1993/0495(COD) - 01/09/1993 - Legislative proposal

The proposal for a decision defines the guidelines for the adoption of an outline scheme concerning the objectives, priorities, broad lines of action and a number of projects of common interest for the implementation of the integrated services digital network (ISDN) as a trans-European network. The principal objectives are as follows: - availability of a Euro-ISDN infrastructure comprising a minimum range of harmonised services; - full geographical coverage by Euro-ISDN in all Member States. The priorities are as follows: - rapid availability of Euro-ISDN services for all professional users, especially SMEs; - maximising use of Euro-ISDN within the Community; - facilitating access to modern communications for the outlying regions. The broad categories of measures are as follows: - eliminating obstacles to the deployment of Euro-ISDN; - ensuring end-to-end interoperability of telematic services; - migration of public and private sector applications to Euro-ISDN; - promotion of Euro-ISDN terminal equipment.
