Stockfarming: prohibition of substances with hormonal or thyrostatic action and of beta-agonists

1993/1036(CNS) - 22/09/1993 - Legislative proposal

This proposal for a directive sought to clarify and consolidate the requirements laid down by the existing directives on substances having a hormonal or thyrostatic action (Directives Nos 81/602/EEC, 88/146 /EEC and 88/299/EEC) and to prohibit the use of beta-agonists in stockfarming, for any purpose whatever, except for the therapeutic treatment of horses and pets.
