Ukraine: further Community macro-financial assistance

1995/0118(CNS) - 20/07/1995

The report presented by Mrs MANN was adopted. As provided for under the initial financial aid package of ECU 85 m, which Parliament approved in 1994, the release of this second instalment is subject to a nuclear safety inspection, which is carried out by the Commission and by the Committee on Monetary Affairs. The report was examined using the consultation procedure. The Committee responsible called for the consultation procedure to be used in those cases where the Council departed from the text which had been approved by Parliament.
