Fisheries products originating in Ceuta: administration of a Community tariff quota

1995/0351(CNS) - 07/05/1996

The REX committee adopted the report by Jaime VALDIVIELSO DE CUÉ on the proposal for a Council regulation opening and providing for the administration of Community tariff quotas for certain fishery products originating in Ceuta. The committee recommended that the regulation be approved due to its particular importance for the economy in Ceuta (Spain). It also adopted an amendment by the rapporteur which called for the annual production of seabass and seabream, which benefit from tariff measures, to be limited to 200 tonnes per year rather than the 100 tonnes proposed by the Commission.
