Objectives and strategies for the management of certain fishing grounds for the period 1994-1997

1993/1246(CNS) - 15/12/1993 - Legislative proposal

The aim of this proposal was to define management targets and corresponding strategies for certain fisheries or groups of fisheries for the period 1994-1997: replenishment of stocks under threat (e.g. round fish); preventing the deterioration of stocks which were better off by restricting fishing activity or, in some cases (e.g. Norway lobster), by directly controlling the activity; greater protection for juvenile fish; a monitoring system to follow how the situation developed over the four years in question.
