

# **Textile industry, clothing: methods for the quantitative analysis of binary textile fibre mixtures (consolidation)**

1994/0008(COD) - 24/01/1994 - Legislative proposal

The aim of this Commission proposal was the legislative consolidation of Directive 72/276/EEC on the approximation of the laws of the Member States relating to certain methods for the quantitative analysis of binary textile fibre mixtures. The new directive was to replace the various directives which were the subject of this consolidation process and would be confined to a compilation of the provisions contained in those instruments, together with the formal amendments required by the consolidation process.
