# Generalized system of preferences: revision of the system 1995-1997 for agricultural products

1994/0210(CNS) - 19/09/1994 - Legislative proposal

This proposal for a regulation aimed to extend until 31 December 1995 the application of Regulations (EEC) Nos 3833/90, 3835/90 and 3900/92 applying generalised tariff preferences in respect of certain agricultural products originating in developing countries. This extension was justified by the time needed to implement a new tariff system as a result of the Uruguay Round for agriculture, fisheries and processed agricultural products. Specific adjustments were however envisaged, particularly for certain products from countries that were engaged in combating the production and trafficking of drugs (Andean countries).
