Multi-annual Community action concerning the development of ISDN as a trans-European network

1993/0495(COD) - 17/11/1994 - Modified legislative proposal

The amended proposal incorporates five of the six amendments introduced by Parliament, particularly those which: - added a reference to broadband networks; - proposed that the text relating to EURO-ISDN should apply equally to applications software; - extended the scope of the objectives to include countries other than the Member States (EEA countries and those which had concluded association agreements with the Community); - concerned the introduction of the infrastructure required for the development of ISDN in accordance with Community rules and the needs of the market; - introduced into the proposed measures the list of five basic services (plain file transfer, electronic mail and messaging services, generalized access to databases, videophony and facsimile group 4).
