Intervention threshold mechanism in the fresh fruit and vegetables sector

1995/0072(CNS) - 16/03/1995 - Legislative proposal

As from 1.01.1995, and as a result of the enlargement of the European Union, the intervention threshold mechanism in the fresh fruit and vegetables sector needed to be adapted in order to bring it into line with production in the three new Member States. The amendment proposed by the Commission relates to tomatoes, apples, cauliflower and peaches, the only products produced in the new Member States which are subject to a threshold. - for apples, this amendment would apply from the 1994/1995 marketing year; - for tomatoes, peaches and cauliflower, the amendment of the thresholds and overruns would only apply from the 1995/1996 marketing year.
