Dried fodder: common organisation of the markets COM

1995/0073(CNS) - 27/03/1995 - Legislative proposal

Following the accession of Austria, Finland and Sweden to the European Union, the proposal sought to establish these countries' national guaranteed quantities (NGQs) for dried fodder in accordance with the limits laid down for the other Member States, and consequently to adapt the maximum guaranteed quantities (MGQs) for the Community. An MGQ of 4,412,400 tonnes of dehydrated fodder, divided among the Member States, was instituted for each marketing year. For the three new Member States the NGQ was as follows: - Austria: 4,400 tonnes - Finland: 3,000 tonnes - Sweden: 11,000 tonnes. The MGQ for sun-dried fodder was set at 443,500 tonnes, divided among Greece, Spain, France, Italy and Portugal.
