Medical devices including blood and plasma derivates

1995/0013B(COD) - 19/04/1995 - Legislative proposal

Following the splitting of the initial Commission proposal and the adoption of Directive 98/79/EC concerning in vitro diagnostic medical devices, the proposed amendment seeks to extend the scope of application of Directive 93/42/EEC to medical devices incorporating derivatives of human blood and human plasma only.
