Conservation and management of fishery resources: eligibility of expenditure by the Member States (amend. Regululation (EEC) No 2847/93)

1995/0142(CNS) - 30/10/1995 - Modified legislative proposal

The Commission, with a view to improving the effectiveness of the Community's financial contribution, incorporated in its amended proposal those amendments which provided that: - the programme of controls should be based on an analysis of the risks involved; - a substantial level of Community participation was required; - Member States should make their first submission before 15/11/95 when submitting an application for aid for the following year; - a statement of financial commitment should be addressed to the Commission by the Member States, following a request for aid; - the Commission should set a time-limit for the investigations which have to be carried out by the Member States, if it believes that the resources are not being used for the intended purposes. The Commission did not adopt the other amendments.
