Agricultural prices 1996/1997: sheepmeat and goatmeat (amend. regul. 3013/89/EEC)

1996/0069(CNS) - 14/02/1996 - Legislative proposal

Agricultural prices and related measures 1996/97 - Sheepmeat and goatmeat. With the aim of making the private storage procedure more effective, in the event that a swift intervention is required (sudden market price fall in a certain quotation zone or agreement from the Commission for a defined but limited operation), the Commission proposes to modify the basic regulations establishing the possibility to foresee at any market price level the need for private storage by means of the procedure which fixes in advance the amount of aid (the procedure by tender remaining, however, the rule to follow in the majority of cases). Under these conditions, a single management committee could, if necessary, vote without unnecessary delay on the amount they judge to be adequate and on the maximum acceptable quantity to be put into storage within a certain deadline. An extension of the derogation granted to the new German Länder as regards the application of the limit of the ewe premia is also proposed.
