Quality assurance in higher education: European cooperation

1997/0121(SYN) - 02/07/1998 - Modified legislative proposal

In its re-examined proposal, the Commission has incorporated the single amendment adopted by Parliament at second reading. This calls for encouragement and help for higher education institutions to use quality assurance to improve the quality of teaching, learning and training in research (an important aspect of the task of higher education institutions which is often closely linked with education in general).
