

Industrial pollution: reduction of emissions of volatile organic compounds (VOC)

1996/0276(SYN) - 15/12/1998 - Modified legislative proposal

The revised Commission proposal incorporates Parliament's amendments which seek to: - add data on occupational exposure to information exchange activities; - introduce a less strict provision for determining compliance with the requirements of the proposed directive; - extend the definition of vehicle refinishing to trailers (vehicle category O); - limit the scope of the derogation for less stringent emission limits (without accepting a reduction in consumption thresholds).
