Safety requirements: cableway installations intended to carry passengers

1994/0011(COD) - 17/12/1999 - Commission opinion on Parliament's position at 2nd reading

Parliament proposed 12 amendments to the Council's common position. The Commission regards all these amendments as relevant since they aim to improve the clarity and accuracy of several provisions, notably those concerning the scope and the exclusions of the proposals. The draft directive covers cableway installations 'designed to carry persons', rather than merely 'with the object of providing a passenger transport service'. Mining installations are excluded from the scope of the directive.
