Dangerous substances and preparations: limiting the market availibility (constitutive consolidation)

1991/0402(COD) - 09/09/1991 - Legislative proposal

This proposed consolidated version of Directive 76/769 aims to produce one single text from the original Directive and the subsequent amendments made to it. This consolidation is done in the interests of clarity and of the ready comprehension of Community law. The existing Directives would be replaced by one new one, which would leave their substance untouched but would assemble them into a single text, with only the formal amendments required by the operation itself.
