

# **Free movements of goods: exchange of information on national measures**

1993/0489(COD) - 10/07/1995 - Commission communication on Council's position

In the Commission's view, the text of the common position - which integrated all the EP amendments retained by the Commission in its amended proposal - represented an excellent summary of the work carried out by the various EU institutions with a view to establishing a simple and effective procedure for the exchange of information on national measures derogating from the principle of the free movement of goods within the Community.
