Biocidal products for non-agricultural uses: common rules for national authorisations

1993/0465(COD) - 10/01/1997 - Commission communication on Council's position

The Commission supports the common position. The changes made were suggested by the Member States in order to clarify or simplify certain aspects of the authorization procedures. As a result the text is simpler but still highlights the main objectives of the proposal, i.e. environmental protection, while guaranteeing the free movement of biocidal products.
