Support system for producers of certain arable crops (amend. Regul. 1765/92/EEC)

1994/0217(CNS) - 12/12/1994 - Final act

The Council regulation made certain changes to the support system for producers of certain arable crops (durum wheat, oilseeds). The new regulation covered two types of measures applicable from the 1995/96 financial year: - granting aid of ECU 115/ha for a limited area of 50 000 ha of durum wheat, outside the traditional zones in France, and providing for an increase in the areas recognised as traditional areas for the production of durum wheat in Spain (+20 000 ha), Portugal (+5 000 ha) and Italy (+5 000 ha); - in Germany, providing for different penalties in the various Lnder as a result of a simultaneous overrun in the maximum guaranteed area for oilseeds and the national reference area; - enabling the Member States to limit areas for which a producer could receive specific compensatory payments for sowing oilseeds.
