

Health problems affecting intra-Community trade in bovine animals and swine

1994/0018(CNS) - 22/06/1995 - Final act

Council Directive 95/25/EC amended Directive 64/432/EEC laying down the conditions to be fulfilled by bovine animals intended for trade by introducing derogations relating to the test requirements in the case of bovine animals aged less than 30 months intended for meat production which: - came from a herd officially tuberculosis-free and officially brucellosis-free; - were identified by a special mark at the time of their dispatch and remained under supervision until their slaughter; - had not come into contact during transport with bovine animals not coming from herds officially free from those diseases. The Member States should bring into force the provisions comprising possible sanctions necessary to comply with the directive not later than 31 December 1995.
