Hops: aid to producers for the 1994 harvest

1995/0153(CNS) - 25/09/1995 - Final act

Council Regulation (EC) No 2284/95 gives aid to Community hop producers, for the 1994 harvest, for the growing of aromatic and bitter varieties, and other categories, as well as for experimental stocks. This regulation means an increase in the average level of aid given to producers of aromatic and bitter variety categories, and a slight decrease for the "other varieties" category, including experimental types, compared with the 1993 harvest.
