Fisheries products originating in Ceuta: administration of a Community tariff quota

1995/0351(CNS) - 21/06/1996 - Text adopted by Parliament, 1st reading/single reading

By adopting the report by Mr Valdivielso de Cué (PPE, E), Parliament approved the proposal for a Regulation in question, subject to the following amendments: - it called for the Commission's proposed quota for bream and bass to be doubled (from 100 to 200 tonnes a year), since it maintained that gilt head bream and bass were products for which there was substantial demand in the Union. An increase in the quota would not, therefore, lead to any distortion on the Community market, - the EP also noted that aquaculture in Ceuta had greatly expanded in recent years and Community support for fish farming had helped to stimulate the region's economy.
